International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1–3

Richard H. Gallagher Memorial Issue

EDITORIAL 1

EULOGY 3

Achievements and some unsolved problems of the finite element method: O. C. Zienkiewicz 9

Finite element simulation of metal casting: R. W. Lewis and K. Ravindran 29

An adaptive-order discontinuous Galerkin method for the solution of the Euler equations of gas dynamics: C. E. Baumann and J. T. Oden 61

Consistent return mapping algorithm for chemoplastic constitutive laws with internal couplings: J. Sercombe, F.-J. Ulm and H.-A. Mang 75

A survey of recent shell finite elements: H. T. Y. Yang, S. Saigal, A. Masud and R. K. Kapania 101

Further discussion on four-node isoparametric quadrilateral elements in plane bending: N. Lautersztajn-S and A. Samuelsson 129

Shakedown analysis in poroplasticity by linear programming: G. Cocchetti and G. Maier 141

Meshing environment for geometry-based analysis: M. S. Shephard 169

On mixed finite element formulations and stress recovery techniques: A. Mota and J. F. Abel 191

A mixed-enhanced formulation for tetrahedral finite elements: R. L. Taylor 205

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services: Abstract Jnl. in Earthquake Engineering, Applied Mechanics Reviews, BHRA Fluid Engineering Centre, Boundary Elements Communications, CITIS–Civil Engineering Abstracts, Compumath Citation (ISI), Current Contents/Engineering, Computing & Technology (ISI), Engineering Index Inc, Eng. Societies Library, Fluid Abstracts and FLUIDEX, Geodex, Geotechnical Abstracts, Indian Society of Earthquake Technology, INSPEC, Int. Petroleum Abstracts, Materials Information, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, Newsletter of Engineering Analysis Software, PASCAL, Research Alert (ISI), Science Citation Index (ISI), SCISEARCH Database (ISI), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik.

Automated 3-D crack growth simulation: B. J. Carter, P. A. Wawrzynek and A. R. Ingraffea 229

Analysis and load carrying behaviour of imperfection sensitive shells: W. Wunderlich and U. Albertin 255

The force method revisited: T. Kawai 275

Triangular composite finite elements: Y. Guo, M. Ortiz, T. Belytschko and E. A. Repetto 287

On upwind methods for parabolic finite elements in incompressible flows: D. Hendriana and K. J. Bathe 317

On modelling thermal oxidation of Silicon I: theory: V. S. Rao and T. J. R. Hughes . . 341

On modelling thermal oxidation of Silicon II: numerical aspects: V. S. Rao, T. J. R. Hughes and K. Garikipati 359

A posteriori error estimation and adaptivity for elastoplasticity using the reciprocal theorem: F. Cirak and E. Ramm 379

A variational principle for the formulation of partitioned structural systems: K. C. Park and C. A. Felippa 395

Some notes on the early history of hybrid stress finite element method: T. H. H. Pian 419

Guaranteed computable bounds for the exact error in the finite element solution—Part II: bounds for the energy norm of the error in two dimensions: T. Strouboulis, I. Babuška and S. K. Gangaraj 427

Accurate determination of transverse normal stresses in hybrid laminated panels subjected to electro-thermo-mechanical loadings: M. Malik and A. K. Noor 477

Surface mesh sizing control: S. J. Owen and S. Saigal 497

Application of the FETI method to ASCI problems—scalability results on 1000 processors and discussion of highly heterogeneous problems: M. Bhardwaj, D. Day, C. Farhat, M. Lesoinne, K. Pierson and D. Rixen 513

New concepts in meshless methods: S. N. Atluri and T. Zhu 537

Rotation-free triangular plate and shell elements: E. Oñate and F. Zárate 557

Refined quadrilateral element based on Mindlin/Reissner plate theory: C. Wanji and Y. K. Cheung 605

Adaptive mesh generation for fluid mechanics problems: P. Nithiarasu and O. C. Zienkiewicz 629

Analysis of functionally graded plates: J. N. Reddy 663

Compatibility conditions of structural mechanics: S. N. Patnaik, R. M. Coroneos and D. A. Hopkins 685

Efficient interfacing of fluid and structure for aeroelastic instability predictions: N. Sarigul-Klijn 705

Interdisciplinary computational mechanics—some computational problems in naval ship design: R. G. S. Barsoum 729

Calculation of pressure in a mushy zone: J. C. Heinrich and E. McBride 735

A discontinuous Galerkin model for precipitate nucleation and growth in aluminium alloy quench processes: N. Sobh, J. Huang, L. Yin, R. B. Haber, D. A. Tortorelli and R. W. Hyland Jr. 749

ANNOUNCEMENTS 769

AUTHOR INDEX 773

KEYWORD INDEX 775

Issue No. 4

Intersecting and trimming parametric meshes on finite element shells: L. C. G. Coelho, M. Gattass and L. H. de Figueiredo 777

A boundary-perturbation finite element approach for shape optimization: D. Givoli and T. Demchenko 801

On the solution of an inverse natural convection problem using various conjugate gradient methods: H. M. Park and O. Y. Chung 821

Shell topology optimization using the layered artificial material model: S. J. Lee, J. E. Bae and E. Hinton 843

The iterative group implicit algorithm for parallel transient finite element analysis: S. Modak and E. D. Sotelino 869

Qualitative measures for initial meshes: D. A. Field 887

On immunizing five-beta hybrid-stress element models from 'trapezoidal locking' in practical analyses: K. Y. Sze 907

CONFERENCE DIARY 921

Issue No. 5

Three-dimensional hybrid-Trefftz stress elements: J. A. Teixeira de Freitas and F. L. S. Bussamra 927

Singular-ended spline interpolation for two-dimensional boundary element analysis: P. L. de Almeida Barros and E. de Mesquita Neto 951

Non-reflective planar boundary condition based on Gauss filter: R. P. Bonet, N. Nigro, M. A. Storti and S. Idelsohn 969

Using mathematical optimization in the CFD analysis of a continuous quenching process: D. J. de Kock, K. J. Craig and J. A. Snyman 985

Numerical homogenization of *N*-component composites including stochastic interface defects: M. Kamiński and M. Kleiber 1001

A practical rule for the derivation of transition finite elements: I. H. Guzelbey and B. Kanber 1029

Methods for connecting dissimilar three-dimensional finite element meshes: C. R. Dohrmann, S. W. Key and M. W. Heinstein 1057

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 15, Number 12 . . . 1081

Issue No. 6

A point collocation method based on reproducing kernel approximations: N. R. Aluru 1083

Numerical implementation of a shape memory alloy thermomechanical constitutive model using return mapping algorithms: M. A. Qidwai and D. C. Lagoudas 1123

One-dimensional dispersion analysis for the element-free Galerkin method for the Helmholtz equation: S. Suleau and Ph. Bouillard 1169

Correction and stabilization of smooth particle hydrodynamics methods with applications in metal forming simulations: J. Bonet and S. Kulasegaram 1189

Element free analyses of shell and spatial structures: H. Noguchi, T. Kawashima and T. Miyamura 1215

Issue No. 7

Time-domain soil–structure interaction analysis in two-dimensional medium based on analytical frequency-dependent infinite elements: D.-K. Kim and C.-B. Yun 1241

Optimal transformations of the integration variables in computation of singular integrals in BEM: V. Sladek, J. Sladek and M. Tanaka 1263

Results of von Neumann analyses for reproducing kernel semi-discretizations: M. A. Christon and T. E. Voth 1285

Regularization of material instabilities by meshfree approximations with intrinsic length scales: J.-S. Chen C.-T. Wu and T. Belytschko 1303

Parallel computation of meshless methods for explicit dynamic analysis: K. T. Danielson, S. Hao, W. K. Liu, R. Aziz Uras and S. Li 1323

Multi-scale methods: W. K. Liu, S. Hao, T. Belytschko, S. Li and C. T. Chang 1343

CONFERENCE DIARY 1363

Issue No. 8

Application of essential boundary conditions in mesh-free methods: a corrected collocation method: G. J. Wagner and W. K. Liu 1367

hp-Clouds in Mindlin's thick plate model: O. Garcia, E. A. Fancello, C. S. de Barcellos and C. Armando Duarte 1381

The generalized finite element method: an example of its implementation and illustration of its performance: T. Strouboulis, K. Copps and I. Babuška 1401

Recent developments of free mesh method: G. Yagawa and T. Furukawa 1419

Quadrilateral approaches for accurate free mesh method: T. Furukawa, C. Yang, G. Yagawa and C.-C. Wu 1445

Meshless method for linear elastostatics based on a path integral formulation: E. Pardo 1463

An assumed strain formulation of efficient solid triangular element for general shell analysis: J. H. Kim, Y. H. Kim and S. W. Lee 1481

Two end variable singularity boundary elements and their applications in crack–crack interaction problems: N. K. Mukhopadhyay, S. K. Maiti and A. Kakodkar 1499

Issue No. 9

The boundary node method for three-dimensional problems in potential theory: M. K. Chati and S. Mukherjee 1523

Node-based uniform strain elements for three-node triangular and four-node tetrahedral meshes: C. R. Dohrmann, M. W. Heinstein, J. Jung, S. W. Key and W. R. Witkowski 1549

Accurate radiation boundary conditions for the time-dependent wave equation on unbounded domains: R. Huan and L. L. Thompson 1569

An accurate four-node shear flexible composite plate element: G. Singh, P. Reveendranath and G. Vekateswara Rao 1605

Sensitizing according to Courant the Timoshenko beam finite element solution: J. Freund and E-M. Salonen 1621

Analysis of the small amplitude sloshing of a liquid in a rigid container of arbitrary shape using a low-order boundary element method: S. Dutta and M. K. Laha . . . 1633

Issue No. 10

A 2-D meshless model for jointed rock structures: X. Zhang, M. Lu and J. L. Wegner . 1649

Ductile damage analysis of elasto-plastic shells at large inelastic strains: A. Eckstein and Y. Başar 1663

Implicit characteristic Galerkin method for convection–diffusion equations: X. Li, W. Wu and O. C. Zienkiewicz 1689

Semi-sigmoidal transformations for evaluating weakly singular boundary element integrals: P. R. Johnston 1709

A hybrid flux model for heat conduction problems: A. A. Cannarozzi, F. X. Momanyi and F. Ubertini 1731

Parallel solvers for the transient multigroup neutron diffusion equations: R. Scheichl . 1751

An enhanced parallel sub-domain generation method for mesh partitioning in parallel finite element analysis: J. Sziveri, C. F. Seale and B. H. V. Topping 1773

CONFERENCE DIARY 1801

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 16, Number 1 . . . 1806

Issue No. 11

Optimization of thermal processes using an Eulerian Formulation and application in laser surface hardening: S. M. Rajadhyaksha and P. Michaleris 1807

Stress recovery and error estimation for shell structures: A. A. Yazdani, H. R. Riggs and A. Tessler 1825

On the singularities of Green's formula and its normal derivative, with an application to surface-wave–body interaction problems: S. A. Yang 1841

On the efficient computation of the stress components near a closed boundary in plane elasticity by using classical complex boundary integral equations: N. I. Ioakimidis . 1865

A Multiplicative finite strain finite element framework for the modelling of semi-crystalline polymers and polycarbonates: A. Masud 1887

A rate-consistent and intrinsically path-dependent incremental method for plastic buckling problems: M. Ritto-Corrêa and D. Camotim 1909

Issue No. 12

A functional for shells of arbitrary geometry and a mixed finite element method for parabolic and circular cylindrical shells: A. Y. Aköz and A. Özütok 1933

Topology optimization for tunnel support in layered geological structures: L. Yin and W. Yang 1983

An efficient solution method for finite element ring-rolling simulation: K. Davey and M. J. Ward 1997

Development of physically based meshes for two-dimensional models of meandering channel flow: M. S. Horritt 2019

Subdivision surfaces: a new paradigm for thin-shell finite-element analysis: F. Cirak, M. Ortiz and P. Schröder 2039
